The controller will have a scaled down version of the module on earth which by manipulating the earth module the lunar module will follow these actions. This will give the controller a better feel for what the module is doing. Otherwise the operation of the module will be controlled by the microprocessors on-board in the following steps. 1. Follow the mobile lunar drill to the specified drill site ia a modified tow. 2. Unhitch from the lunar drill and extend legs to allow movement to a position in such a way so that the robotic arm may load the drill string. 3. Attach the drill dit to the first part of the drill string. 4. Load drill string extensions as required for desired...
