Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 Excerpt: .the solid matters contained in tho sweat, were much greater than in the white races. It has been shewn in the article Skin that the sweatglands, like the lungs and kidneys, act as depurating organs, aud separate and carry off effete matters from the blood. This ehminatiugaction of the skin is modified in various diseases; lu some cases being diminished, as in the early stage of fevers, in inflammations before suppuration commences, in scurvy, diabetes, sunstroke, .-, while it is more or less increased in the sweating stage of ague, in aculo rheumatism, in Asiatic cholera, in certain adynamic fevers, lu the advanced stages of pulmonary consumption, in the formation of matter in internal parts, c. The sweat is naturally acid in health, but in prolonged sweating tho secretion becomes neutral, and finally alkaline. Little is known with certainty regarding tho coloring matters of sweat, la...

Reviews

This book can be worthy of a read, and much better than other. It usually fails to charge a lot of. I realized this publication from my dad and i encouraged this pdf to understand.

-- Prof. Flo Cruickshank DDS

The most effective publication i ever read through. I could possibly comprehended almost everything using this composed e pdf. I am very easily could get a enjoyment of reading through a composed pdf.
